DETAILED ACTION

Claims 33-56 are presented for examination. Claims 33-56 are presented for examination. Applicant further filed a request for reconsideration on 4/11/2005. In light of Applicant's arguments, the Examiner withdraws the grounds of rejection of claims 33-56 based on 35 USC 103. New grounds of rejection of claims 33-56 based on 35 USC 102 are established in the instant office action as set forth in detail below.

Response to Arguments

Applicant's arguments with respect to claims 33-56 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 33-56 are rejected under 35 U.S.C. 102(e) as being anticipated by

Damico et al., Pat. No. 5,819,285 (hereinafter Damico).

As to claims 33, 35, 37, 39, 41-45, 47, 49, 51, and 53-56, Damico discloses a method and system for managing information using a gateway (i.e. co-marketer,

www.cm.com)(see Fig. 1, units 122) and, the method and system comprising the steps of:

receiving a request to communicate with a network accessible datastore having a particular network address (i.e. clicked on an advertisement on the www sites of co-marketers, col. 5, lines 29-34);

modifying the particular network address of the datastore to incorporate the address of the intermediary gateway device (i.e. first part of destination URL is formed of the destination URL and the second part of a UNIX symbolic link is prepended to the destination filename)(see Fig. 1, unit 128 and col. 5, lines 37-50 and co. 6, lines 1-16) and

providing access to the network addressable datastore through the intermediary gateway device using the modified network address to access the network addressable datastore (i.e. first part of destination URL is formed of the destination URL and the second part of a UNIX symbolic link is prepended to the destination filename)(see Fig. 1, unit 128 and col. 5, lines 37-50 and co. 6, lines 1-16) wherein the gateway controls access to the network addressable datastore (i.e. facilitating communications between a user and OLS (On line Service)(col. 5, lines 19-24).

As to claims 34, 36, 38, 40, 46, 48, 50, and 52, Damico discloses, wherein the modifying step further includes the substep of: modifying the particular network address of the datastore to include the address of the intermediary gateway device (i.e. first part of destination URL is formed of the destination URL and the second part of a UNIX

symbolic link (from the URL address of the co-marketer) is prepended to the destination filename)(see Fig. 1, unit 128 and col. 5, lines 37-50 and co. 6, lines 1-16).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Pat. No. 5,812,769 discloses a system for tracking referrals from co-marketers.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Kalinowski, whose telephone number is (571) 272-6771. The examiner can normally be reached on Monday to Friday from 10:00 AM to 6:30 PM.
